CLINICAL PERFORM®

360-Degree Visibility for Superior Specimen Transport

Today's clinical laboratories are facing increasing pressures to reduce the time and cost of their transport and delivery operations. This translates into a critical need to improve operational efficiencies and productivity by enhancing and automating each stage of the transportation and delivery processes.

Proven, reliable and simple-to-use, Clinical Perform® automates your workflow and gives you 360-degree control over your couriers' operations — enabling you to better serve your customers and reduce the time and cost associated with doing it.

A highly competitive market, coupled with the truly sensitive and irreplaceable nature of your specimens, make it vital to provide superior service and consistently be "mistake free." Clinical Perform® can help you achieve both.

With the ability to track specimens, supplies and drivers in real-time, as well as provide chain-of-custody reports and deliver enhanced customer transparency, Clinical Perform® will offer a strategic advantage — making your lab more attractive to prospective customers than labs without these capabilities.

Clinical Customers

“ We have seen ROI in the form of improved specimen tracking and processing, as well as a 61 percent reduction in missed pick-ups. We've also realized unexpected savings and increased employee productivity. This has resulted in us being able to grow the businesses without increasing overhead.”

Ron Rayot, VP and Director of Logistics
for BRLI

CLINICAL PERFORM[®]

› Measurable Benefits

- 360-degree insight into the entire clinical transport process
- Superior efficiencies and cost savings
- Increased rates of accurate and on-time pick-ups and deliveries
- Improved customer retention and loyalty
- Decreased call center costs
- Increased employee productivity
- Better fuel efficiencies
- Intuitive and easy-to-use interface
- High user adoption
- Advanced ability to track SLA performance measures
- Ongoing training and support
- Seamless integration into your existing processes
- Leverage existing carrier and device choices
- Consistent service delivery with increased rates of accurate and on-time deliveries and pick-ups
- Increased operational efficiencies and productivity

› Key Functionalities

- Real-time chain-of-custody tracking with GPS
- Dispatch control of scheduled routes and on-call customers
- Interactive maps and geofences
- Barcoded and non-barcoded specimen tracking
- Temperature-controlled container support
- Easy reconciliation by specimen type
- Item-level tracking and reconciliation
- Delivery notifications
- Document physical pickup location for increased traceability
- Configurable delay reason codes
- Tracking of driver breaks
- Operational reports and alerts
- Productivity and performance reports
- Select comments from a configured list to provide further detail on serviced items
- Capture a lat/long for locations that are incorrectly geo-coded
- Track driver breaks
- Enter delay reason codes for increased service detail and customer accountability
- Capture the physical location of pickups and deliveries within the customer site for increased traceability and service detail

Aircllic recommends unlimited data plans. Carriers will work with customers directly to ensure an appropriate data plan is activated prior to service.

Aircllic provides best-in-class mobile supply chain and logistics software products. Scalable, reliable and hardware-independent, the Company's SaaS-based products drive efficiencies and productivity that measurably reduce costs and increase service. As a market leader, Aircllic's customer portfolio includes more than 300 global enterprises that are realizing improvements in their business operations.
