TRANSPORT PERFORM®

Deliver Orders as Expected - On Time, Every Time.

Seven of the top ten third party logistics providers (3PLs) rely on Transport Perform® to remove paper and processing costs from their delivery process, significantly reduce delivery errors, improve service levels, and add transparency and control into their delivery and logistics operations.

UPS, Schneider National, DB Schenker, Ryder, and Exel Logistics, have become true industry leaders because of their ability to deliver orders on time, as expected, at a competitive price. These firms and dozens of others have turned to Transport Perform® to gain a competitive advantage through reduced costs and improved customer service in their delivery operations.

Simplified Mobility

Transport Perform® is a mature, cloud-based software product, which means it's easy to implement and easy to use. Because Transport Perform® is highly flexible, it can be easily configured to fit your workflow, and seamlessly integrate with your other software systems. Transport Perform® can be up and running in four weeks, and clients typically see a return on investment within 4-6 months.

Transport Perform® also offers a host of sophisticated features and functionality that ensure order accuracy and operational efficiency. For example, the cross-docking role has the ability to accurately record items received on the dock, as well as those staged and loaded onto the truck and trailer, resulting in a more efficient, accurate workflow.

Proven ROI

Transport Perform® is proven to save an average of \$400 per truck per month through the elimination of inefficient paper processing, reduced overages, shortages and damages (OS&Ds), and reduced customer service costs. Transport Perform® eliminates costly delivery errors that can impact a company's reputation and increase customer churn. Businesses that use Transport Perform® reduce delivery errors by more than 65 percent annually.

7 out of the top 10 3PLs use Transport Perform®

Average ROI of a Transport Perform® Customer:

- Remove inefficient paper-based processes: \$9 per day per truck
- Reduce OS&Ds: \$4.50 per day per truck
- Lower customer service costs: \$5 per day per truck
- Win more business and maintain long-term client relationships

Total Savings: \$400 per truck per month

"Implementing Aircllic's mobile software allows us to quickly respond to our clients' needs, operate more efficiently, reduce paper processes, and exceed our customers' delivery expectations,"

Steve George, Executive VP and CIO, Corporate Courier.
